### **IN THE FOOTPRINTS OF OTHERS**

This weeks Open Technical Lecture is being given by Ed Clark (Director) and Chris Neighbour (Associate) at Arup. see diary for times and date.

The Serpentine Pavillion is an invitation to leading International Architects to build a building on the lawn of the Serpentine Gallery in Hyde Park. Ed Clark and Chris Neighbour are the structural engineers and the construction management for the last 6 years having taken over from Cecil Baumont. They will discuss the previous 11 built pavilions by, Zaha Hadid, Daniel Libeskind, Toyo Ito, Alvaro Siza, Rem Koolhaas, Oscar Niemeyer, Oliafur Eliason, Frank Gehry, SANAA, Jean Nouvel, and Peter Zumthor through to the excavation that is this years Pavillion designed by Herzog & de Meuron and Ai Weiwei.

The only pavillion not to have been built was by MVRDV.

“As we dig down into the earth to reach the groundwater, we encounter a diversity of constructed realities such as telephone cables, remains of former foundations or backfills. Like a team of archaeologists, we identify these physical fragments as the remains of the eleven Pavilions built between 2000 and 2011”

Herzog & de Meuron and Ai Weiwei, (from their Architects’ Statement)
