

## How to operate the AV Equipment

### Turn on the display screen

Press On (top left button) on control panel

Select device to be displayed, e.g. Laptop on control panel.

### Laptop connection via VGA

Connect the laptop's external monitor output (15-pin 'D-shape' connector) to the trailing VGA cable

Enable the external monitor (VGA) output on your laptop, e.g. Fn+F7 (key combination may vary)

For laptop audio (if required): connect laptop audio/headphone output to the trailing audio cable (mini-jack connector). The laptop's own volume may also need to be adjusted.

Adjust volume as required using VOLUME buttons on right-hand side of control panel.

### iPad connection via VGA

Follow the instructions above

Use suitable VGA adaptor

Adjust volume as required using VOLUME buttons on right-hand side of control panel.
